Thank you for choosing Impact.

The Impact LS-CS40M C-Stand with Sliding Leg 40 in. features a top leg that slides up and down the main riser so you can set up your C-stand on uneven ground—like stairs or a steep incline—or on furniture, sidewalk curbs, or set pieces. The other two legs feature a locking mechanism that allows them to swing out and lock into place for easy setup, and to collapse flat so you can store your C-stands side by side.

Often used in conjunction with a grip head and grip arm (sold separately, see *Recommended Accessories*), you can use the Impact C-Stand to hold lights and light modifiers, such as flags, “cookies,” etc. The Impact C-stand is ideal for mounting heavy items because the stand has a low center of gravity, and it easily accepts saddlebag-style sand bags for additional stability.

The Impact LS-CS40M C-Stand with Sliding Leg 40 in. is compatible with other grip equipment available from Impact Studio Lighting. For more information, refer to the *Recommended Accessories* chapter of this pamphlet.
